

Dear Legislators,

I Jeanica Santiago am 10 years old, and i'm in fifth grade. I go to DiLoreto Magnet School and attend the New Britain Youth Museum After-School Sisters and Science. Sisters and Science is a great Program.

This Program gave me the opportunity to realize that Science is every, to think outside the box, and that education is very important. Sisters and Science taught me all this but they didn't teach me it alone, they taught another 24 girls. They taught me to work with people, and respect them even do you dont get along very well. (we all do get along).

Please take this in to consideration when you are cutting budgets. It will really affect us if you cut our budget. Thank you for listening

Thank you,  
Jeanica S.

Education!

Our Future!

Dear legislator,

I am Wendely Garcia  
and I am from Sister in Science  
and I heard that you are budget cutting  
After school programs please don't do that

We are depending on you to not do that and  
budget something else. Please do not let us sisters  
down today with our hearts that are nice and  
cherishing. Us girls are not bad were good  
people in New Britain, Connecticut if you budget  
cut us we are gonna feel so sad and what are  
we going to do. Are two teachers who do this  
program are Ms. Lisette and Ms. Polanco.  
Please don't do this.

Thank you,  
and sincerely  
Wendely Garcia

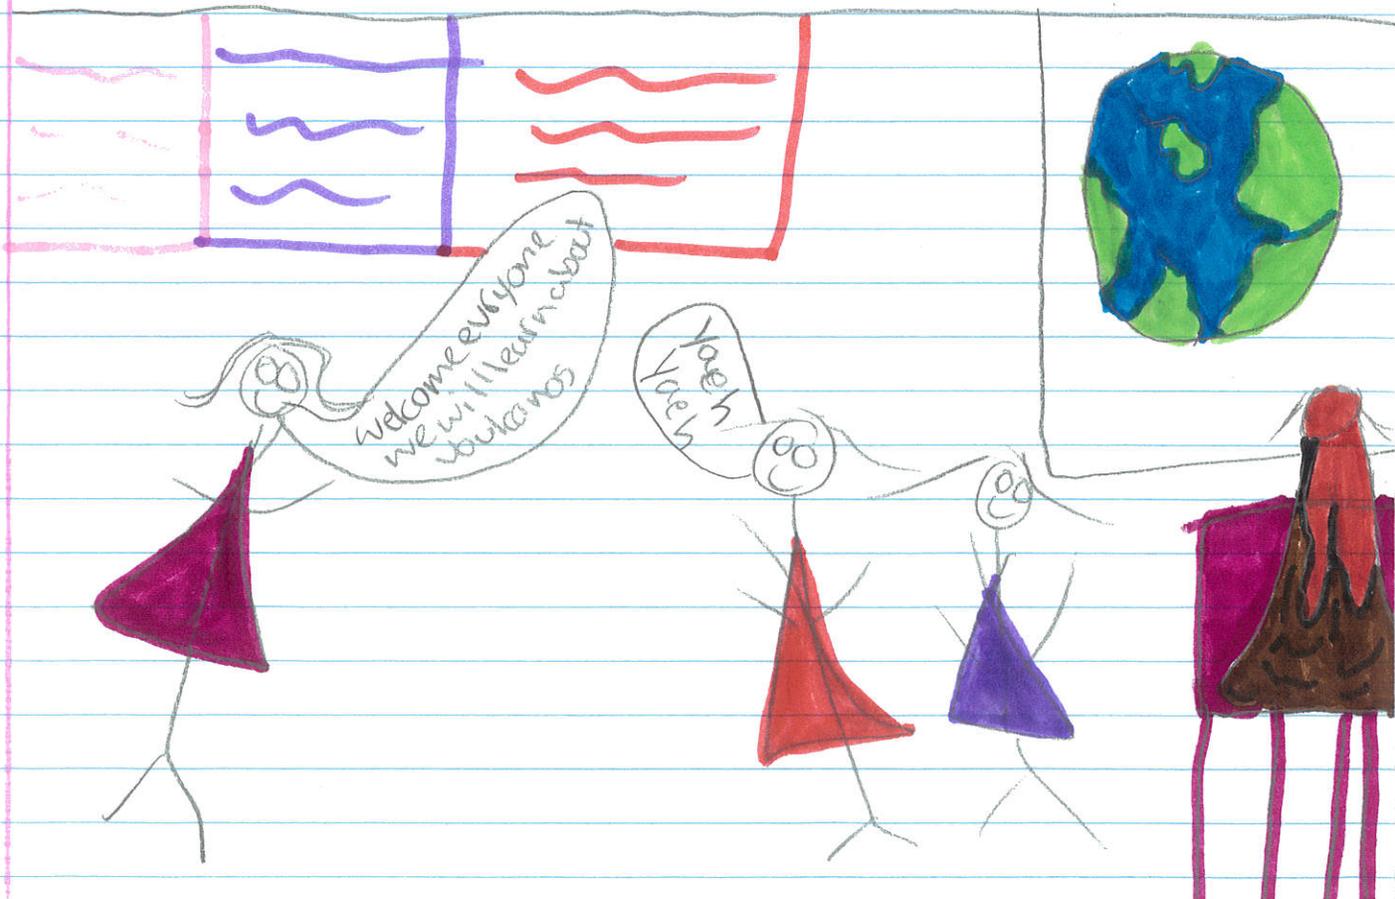

Don't cut After  
school programs

Dear legislators

I hope you don't take away our after school program. Sister and science is the greatest thing that happened to me ever since I've gone to the program I've improved in science. I went from a F- to a A+ I've improved so please don't take our hope away.

Thank you

Sincerely, Geraldyn

Dear legislators

I am Jeslie Abreu, I am in 4<sup>th</sup> grade and attend an after school program called Sisters in Science. I go to Diloreto magnet school and I heard you were going to cut money from after school programs. I wanted to say I don't agree with you about that because these programs teach us a lot of stuff. Sisters in Science has helped us girls learn about science and animals. I hope you agree with me.

Thank you  
Jeslie Abreu

I Amberlyz faraco want to keep my program <sup>Sisters & Science</sup> because it teaches me stuff I do not no and I truly think we need more scientist that are woman Miss. Lessete & Miss polanco will allways help us reach are goal and one day will reach are goal and it will be because of this program helping us be who we want to be in the futur. We are able to do fun stuff while learning and I hope you take this sersity and listen to my words very well & please dont cut Sisters and Science none

love

Amberlyz B

# Dear Legislators

Hello My name is Savannah Williams  
I live in New Britain Ct I go  
to Dorothea School I go to a  
After School Program called  
Sisters in Science our teachers  
name is Miss Laset She is  
very grate.

Sisters in science has helped  
me by teaching me math like  
how to average.

Don't cut After School

Thank you  
Savannah Williams

Dear Legislators,

I'm Gianna Reynolds and I'm in 5th grade and I think we need more time in Sisters in Science. I'm writing to tell you that I think we should keep this program because this program has done lots of things to help us girls. One time when we were in the classroom in school we were learning about average and the girls who was in Sisters in Science already knew what's averaging is so we were ahead of the class! Also when there was a science test on animals we did so good and everyone who was in Sisters in Science got no under than an 80%. I hope you'll listen to me :)

Thank you!

Gianna Reynolds

Kailey Rojas

February, 26, 2015

Dear legislators,

I, Kailey Rojas attend DiLoreto Magnet School in New Britain, Connecticut. In DiLoreto they have a 'New Britain Youth Museum's After-school program Sisters-in-Science'. It's probably the best program ever! The program is very special to us.

Sister-in-science has helped me through alot in my science class! Once we were arguing in class and no one knew how to do it except the girls in 'sisters-in-science.' Also this once we had homework to do experiments and we already did most of the experiments!

I'm writing to let you know that I hope you don't cancel any programs! All programs are very fun. I learn alot from the program with my teachers Ms. Hisette and Ms. Polanco. They teach me alot. We also taking field trips! I love this program and that's why you shouldn't cut after school program!

Thank you,

Kailey Rojas

Syrina Anabella Lorenzo 2/26/15

My after school  
Program sisters  
in science

#1 My name is Syrina Lorenzo & I attend the after school program sisters in science. I enjoy this program alot & I hope the govener does not cut the time in this program. I also hope that this program does not get shut down. Also suprisingly this is the funnest program i've ever been to. And when I came here I hope to have lots of fun.

#2 I really hope that one day this program will get more time till 4:30. My science teacher in this program is the most prettiest teacher i've ever had. Her name is Ms. Lisette Velasquez. She is my new favorite science teacher. She is also the most prettiest.

Thank you for listening. Hope you guys really listening.

Dear Legislators,

I am Brendaliz Malava, a 6<sup>th</sup> grader at Di Loreto. The program I go to is, New Britain Youth Museum's Afterschool Sister In Science. I am writing about my program how fun it is so you'll want to take it take it away.

Sister in Science has helped me with math. They teach me different things that I don't know like averages I think it's called that. That or something else that involves math. Then we do something fun like experiment. We made a volcano. Feb/26/15 we are doing our own lip balm.

Thank you for reading this letter I hope you won't take Sister in Science down or other programs in New Britain. This program is really fun and the teachers. We work together to be alive in each other. That's why we never leave a sister behind.

Thank you,  
Brendaliz Malava

Riley Taylor

February 26, 2015

Dear Legislators,

I, Riley Taylor am a fifth grader at Diloreto Magnet School. I am also in New Britain Youth Museum's After-School Sisters in Science program also at Diloreto. Diloreto Magnet School is in New Britain, Connecticut. I think that you shouldn't cut afterschool programs. They are very special to the students.

Sisters in Science has helped me by teaching me how to average when in math class, we were also learning about averaging and I didn't understand. Ms. Lisette Velasquez and Ms. Lillian Dolanco helped me understand averaging. If it weren't for this program, I would get a bad grade in math. I am glad I signed up for this for a second year.

Thank you for listening to this.

Sincerely,

Riley Taylor

Dear Legislators

I go to Diloreto School in  
New Britain. I go to the after  
school program "Sisters in Science".

I really love this program.

Sisters in Science has really  
helped me not just in science  
but in math as well. It is

very fun, educational, and  
entertaining. I really love

to be around the people  
in my program and making  
and creating things with  
them. So please do not cut  
any after school programs.

!! please !!

Thank you with care,

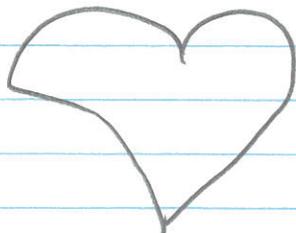

Lesman  

Dear: legislators

I am Dayana I am 9 years old. I go to Diloreto magnet school. I want u not to cut off new Britain after school Program especially sisters in science because I never touch animals but after I went to this Program sister and science this Program made me the happiest kid the nice people and coaches. we even have a song it's like this. "sister in science sisters will be. I believe in u. I believe in me. universal minds science is the key let ourselves be free of negativity sister and science sister will be we believe in you. we believe in me." Thank u for understanding so please don't cut this Program over money.

SUPPORT NEW  
BRITAIN KIDS!!!!

Thank u  
Dayana  
Galvez

Dear Legislators,

My name is Ledithmar López Pérez. I go to Frank J. DiIoreto Magnet School in Connecticut. I have heard that you are going to cut after school programs. I was hoping to show you how important and how these programs help us.

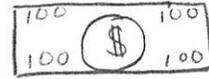

The program I go to is Sisters in Science. Sisters in Science has really helped me in Math and Science. Before I came to this program I had a little trouble in those 2 subjects and now I don't. I also have fun while learning and when I don't understand something in school they help me and others.

If you cut out after-school programs we will not learn in fun ways and we won't understand some stuff in class. We won't understand some stuff in class because sometimes when we don't understand but everyone else does we get scared and do ask. Not only that but in many programs they let us do our homework and we help each other.

In conclusion, if you cut the after-school programs not only will you be taking away most of our chances to become a great student. Also if we're not a good or

great student we won't get into  
to a good college and won't get  
a good job. So we won't make mo-  
money and have a good life. These  
after-school programs helps us and  
it would be unfair and we care  
about our programs.

Sincerely,  
Leditmar

Dear Legislators,

I'm Rachael a 5<sup>th</sup> grader at Frank DiIoreto Magnet School. I'll like to ask you, if you can not take money out my and my peers program. Me, my peers, and my teachers named Ms. Lesette and Ms. Polanco will ask you to please not take out money. In science we do a daily math problem like average, multiplying, and division, we also do a 15 to 20 minute homework time. I like this program.

Thanks for reading this.

Love,

Rachael.
